DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

Claims 74-76 are directed to an invention (Group I invention) that is independent or distinct from the invention/species originally elected (Group II invention and Species E of Fig. 14). See Restriction Requirement of September 28, 2005 and Applicant's Election filed February 01, 2006.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 74-76 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Objections

Claims 31, 36-37, 39, 44, 46, 57 and 63 are objected to because of the following informalities:

In claim 31, at line 2, 4 and 7, "a.", "b." and "c." should be deleted. In claim 36, line 5, "level" should be deleted; and at line 7, "level" and "levels" should be deleted. In claim 37, line 8, "nonlinear elements" should be changed to --rectifiers--. In claim 39, line 1 and 3, "nonlinear elements" should be changed to --rectifiers--. In claim 44, line 2, "an" should be changed to --said--; and at line 3, "a" should be changed to --the--. In claim 46, line 7, 9 and 11, "nonlinear

elements" should be changed to --rectifiers--. In claim 57, line 2, --a-- should be added before "circuitry". And in claim 63, line 2, --a-- should be added before "circuitry".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 4-13, 18-19, 21-24, 31-42, 44-46 and 51-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 31 is incomplete as failing to recite the interconnections between claimed elements. It is suggested to use terms such as --connected to-- or --coupled to-- to set forth the interconnections between "first and second sets of conductive address lines" (claim 31, line 2) and "a series of information-defining nonlinear elements" (claim 31, line 4). Furthermore, in claims 55, 61 and 67, it is unclear how the external circuitry biases the rectifiers of the information-storage circuit.

Claim Rejections - 35 USC § 102

Claims 4-7, 11-13, 18-19, 21-22, 31-42, 44-46 and 51-71 are rejected under 35 U.S.C. 102(b) as being anticipated by Graebel (US Pat 4,661,927 hereafter "Graebel").

As to at least claim 31, Graebel discloses an information storage circuit (Fig. 1) comprising first and second sets of conductive address lines (bitlines B0-B3 and wordlines W0-W2) overlapping each other and defining storage locations; a series of information-defining nonlinear elements (Schottky diodes 28-50); and address circuitry (Y-address buffer/decoder 16 and sense amplifier 20) for disabling all but a selected one of the first set of address lines

Art Unit: 2824

(bitlines B0-B3), wherein the address circuitry comprises a first pattern of rectifiers (diodes 102-108 in Fig. 4) directly connected to the first set of address lines (bitlines B0-B3).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tamura (JP 57-203293) describes a semiconductor integrated circuit.

Tsuyama (JP 57-203294) describes a semiconductor integrated circuit.

Sato et al. (JP 2-98898) describes a diode read-only memory.
